MAINTENANCE AND CARE**POLYPROPYLENE ROPE**

Our rope is made of polypropylene fibres. Just like our other synthetic materials, the rope is specifically designed to withstand any weather conditions, is UV-resistant, and can be left outside all year long.

For maintaining your rope furniture, we recommend using a fabric and upholstery protector to give optimal stain resistance.

To clean spots on the rope, we suggest applying a mist of soapy water with a spray bottle and then work the solution into the rope with a soft cloth by patting or rubbing lightly. rinse the solution thoroughly and then blot excess moisture from the rope using a soft cloth and allow air-drying.

Never use a high-pressure hose on rope furniture.

ALUMINIUM

Aluminium is a light and tough material which is very suitable for outdoor applications. Thanks to its self-protective layer, the material has a high resistance to corrosion.

Our aluminium is coated with a powder coat finish, tinted in a variety of colours. This provides an even an tough finish impervious to moisture and easy to clean.

Powder coated aluminium requires a minimum of maintenance. A gentle clean with water and a non-foaming mild detergent every now and then is all it needs! A microfibre cloth or sponge should be used to wipe over the surfaces of the furniture.
