MAINTENANCE AND CARE

How to maintain a cement table?

As for regular care, we recommend to remove any dirt buildup with water and mild soap. Use a dry cloth or soft brush for dusting off crumbs and leaves.

How to protect a cement table?

While no preventative treatment is required for Vincent Sheppard cement tables, you can use a water-repellent protector as the "Golden Care natural and composite stone" protector once a year. This helps to prevent stains and maintains the new look for longer.
