

# VINCENT SHEPPARD

## Max dining table

Product data sheet

# Max dining table

## MATERIALS

<b>frame</b>	aluminium
<b>frame finish</b>	powder coated
<b>top/finish</b>	untreated teak    black hpl    ceramic
<b>glides</b>	black nylon

## TOP FINISHES

### TOP TEAK

Untreated teak  
W0002

### TOP HPL

Black hpl  
H055

### TOP CERAMIC

Flint  
K001

Portland  
K003

## FRAME COLOURS

### FRAME ALUMINIUM

Black  
A007

Fossil grey  
A033

Dune white  
A045

## DIMENSIONS

### DINING TABLE 90x90

### DINING TABLE 180x90

### DINING TABLE 240x100

## IN THIS COLLECTION

## MAINTENANCE AND CARE

### TEAK

For a quick facelift

Use a moist towel or sponge with a mild solution of water and natural, non-aggressive soap.

For stubborn stains

If your furniture is stained, consider one of the following options:

**Grease spots** have appeared on the furniture: This is a natural feature of the wood and grease spots should gradually disappear after being exposed to sunlight. However, should you wish to remove these blemishes, we recommend using a degreasing agent and gentle scrubbing with a brush. Rinse off with clean water.

The furniture has developed **mildew spots or black blemishes**: This is usually the result of rainwater or sometimes sap dripping from the leaves of trees onto the wood leaving dark marks and spots. Ideally, we recommend the furniture is not placed under trees. However, these marks can be removed by lightly sanding with fine sandpaper.

You spilled **wine** or something else leaving persistent stains: For wine stains, we recommend using methylated spirits to wipe the area clean. Candle wax for example can be removed by placing brown paper over the wax mark and pressing with a warm iron. This will melt the wax, drawing it out of the wood and onto the paper.

### HPL

You can use your HPL side tables inside as well as outside.

Dirt does not easily stick to the material, which makes your side tables easy to maintain.

Use a damp cloth and water to clean spilled solutions. The quicker you remove them, the easier.

Use a solution of water and mild soap to clean more stubborn stains.

### CERAMIC

If you're looking for a material which requires little to no maintenance, yet offers maximum resistance, you would do well to involve ceramic. The material preserves the natural look of stone and offers top of the chart convenience. Cleaning the table with water and mild soap will do the trick!

### ALUMINIUM

Aluminium has a self-protective layer, which prevents corrosion and makes this material very suitable for outdoor applications.

On top of that, it is super easy to maintain. A quick wash with a non-foaming mild detergent every now and then is all it needs!
